DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,498,946. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are claiming obvious variations of MR data acquisition using a non-selective inversion RF-pulse and slice-selective re-inversion pulse.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-14 are rejected under 35 U.S.C. 101 as claims directed to non-statutory subject matter.

Claims to computer programs per se are not statutory subject matter. On the other hand, a claim to a computer-readable medium encoded with a computer program is a computer element

which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer program's functionality to be realized, and is thus statutory. See MPEP 2106, part IV, B, 1(a). See In re Beauregard, 35 USPQ2d 1383 (Fed. Cir. 1995).

The examiner suggests amending the claims to read "A computer-readable medium encoded with a computer program having a set of instructions"

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Bottemly et al. US 5,201,311. Bottemly et al. disclose (abstract, column 10, line 40 –column 11, line 8) a method of generating NMR data using a non-selective inversion RF-pulse and slice-selective re-inversion pulse. Inherent to generation of the pulse sequences is a program encoded on a computer readable medium.

Response to Arguments

Inventorship

6. In view of the papers filed May 01, 2003 it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by removal of Messrs. Tin-

Su Pan, Steve Woloschek, and David He, and substitution of Thomas K. F. Foo and Zahi A. Fayad.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of the file jacket and PTO PALM data to reflect the inventorship as corrected.

Double Patenting

7. The double patenting rejection of claims 1-29 under 35 U.S.C. 101 as claiming the same invention as that of claims 1-29 of prior U.S. Patent No. 6,498,946 is withdrawn in consideration of the amended claims.

Claim Rejections - 35 USC § 102

8. The rejection of claims 1-29 under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter is withdrawn in consideration of the request to change inventorship.

9. The question of priority of claims 1-29 under 35 U.S.C. 102(g) and possibly under 35 U.S.C. 102(f) is resolved in consideration of the request to change inventorship.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
